Timing Confidence

Total ice accumulation in central/southern Kentucky 0.2-0.5" (highest south of WK/BG Pkwys)
Total ice accumulations in southern Indiana/northern Kentucky: 0.1-0.2"

Overview and Impacts

OVERVIEW:

- **Wednesday:** Greatest ice accumulations in southern Indiana and north central Kentucky
Wednesday night – Thursday: Greatest ice accumulations central and southern Kentucky
- Overall greatest ice accumulations, **more than a quarter inch**, will likely occur south of the Western Kentucky/Bluegrass Parkways and north of the Cumberland Parkway
- Cold temperatures will persist into next week. Coldest temperatures are forecast to be Sunday night/Monday morning with wind chills potentially below zero. Additional wintry weather possible Saturday and again Monday-Tuesday.

IMPACTS:

- Power outages and significant tree damage are expected due to the ice
- Significant ice, sleet, and snow may cause dangerous driving conditions
- Travel is strongly discouraged. If you must travel, keep an extra flashlight, food, and water in your vehicle in case of an emergency.
